

Warm human value, *not generic tech.*

Use this visual sheet to keep ChatGPT-generated image slides aligned with the current GnR deck: warm paper, editorial scale, human community, measurable connection, and restrained gold/red/blue accents.

Composition: one clear idea, generous negative space, no dense dashboards or tiny text.

Human tone: warm community scenes, reciprocity, contribution, invitation, connection.

Deck fit: preserve room for top-left eyebrow, large headline, right-side dots, and bottom-right controls.

Avoid: green, blue-purple SaaS gradients, generic AI glow, fake UI, warped logos, unreadable words.

Prompt ChatGPT like a *deck art director*.

Create a text-free 16:9 bitmap background for the Give n Receive deck.
Story beat: [human value / reciprocity / measurable connection / real-world community / pickleball silliness / invitation graph].
Style: warm editorial watercolor/cinematic realism, cream paper, ink, gold/red/blue accents, restrained, premium investor deck.
Avoid: green, generic SaaS/AI stock art, blue-purple gradients, fake app UI, dense text, tiny labels, warped logos.
Leave safe blank space for HTML text and keep important visual content away from the right-side nav dots and bottom-right controls.

If this is a flat image-only slide, use only the exact provided text, make it large and readable, and do not add extra microtext.
